

Task Round – GSA TECH WORLD

Create a single page website with below mentioned options

1. Login
 - a. Email
 - b. Password
2. Register
 - a. Name
 - b. Email
 - c. Mobile Number
 - d. Password
 - e. Address: User should be able to fetch this address from Google Map and in the DB we should be able to save the Latitude and Longitude along with the complete address that the user choose
3. After login a user dashboard should be shown along with a task scheduler option
 - a. Basically we need an option to assign task to other users working in the organization and track the status of it.
 - b. So to assign a task a user will click on add task and the below details should be shown
 - i. Name of the task
 - ii. Date and time
 - iii. Task assigned to (this should be drop down with all the organization related user)
 - c. And to view all the task the dashboard should have all the task listed with task

Please look into the below attached design for reference

Company
